

Download and Implementation Instructions

The download files are usually very large. The *.exe file is a self-extracting, zipped file including all of the other files. Allow ample time if using a dial-up account.

Download the individual files by clicking on the download button and save to your computer in a folder you will remember.

You may also download the *.exe file which is a self-extracting, zipped file with ALL of the scripture for that lesson. Save – do not open – this file into an EMPTY folder. Then double click on the file and it will self extract. All of the scripture for that lesson will be in the folder.

The coding for the Disciple files is: Disciple (D); Class (1, 2, 3, or 4); Lesson (L); Number (##); Day (#). The file "D4L09D3.mp3" would be Disciple 4, Lesson 9, Day 3.

To transfer the files to an MP3 player I have had the most success when the MP3 files are in "My Music" folder. With my RIO player and "Rio Music Manager" software, I am then able to select the files in "My Music" folder and drag them to the top of the RIO player icon and they are transferred. Other players and software should work the same.

There are now portable and car CD players that can play MP3 files. Just burn the files to a CD. If you would like to have this done, please contact us and we will do that for a small fee.

If you have any questions or suggestions we would like to hear from you.
